Darrel,

I slightly reshuffled the organization of the table. Primarily, I added EPA's proposed course of action to those where there is no clear enforcement action pending. For the systems under "PWSSD 23 Connection", I'd want to add something there, but not quite sure what.

See what you think of this for sharing with our management and let me know. I think it may have a little too much info, so might work on a streamlined version as well.

Thanks
Scott
